Chateau Meddybemps®

Meddybemps Miniature Village™

Filling Station - 3

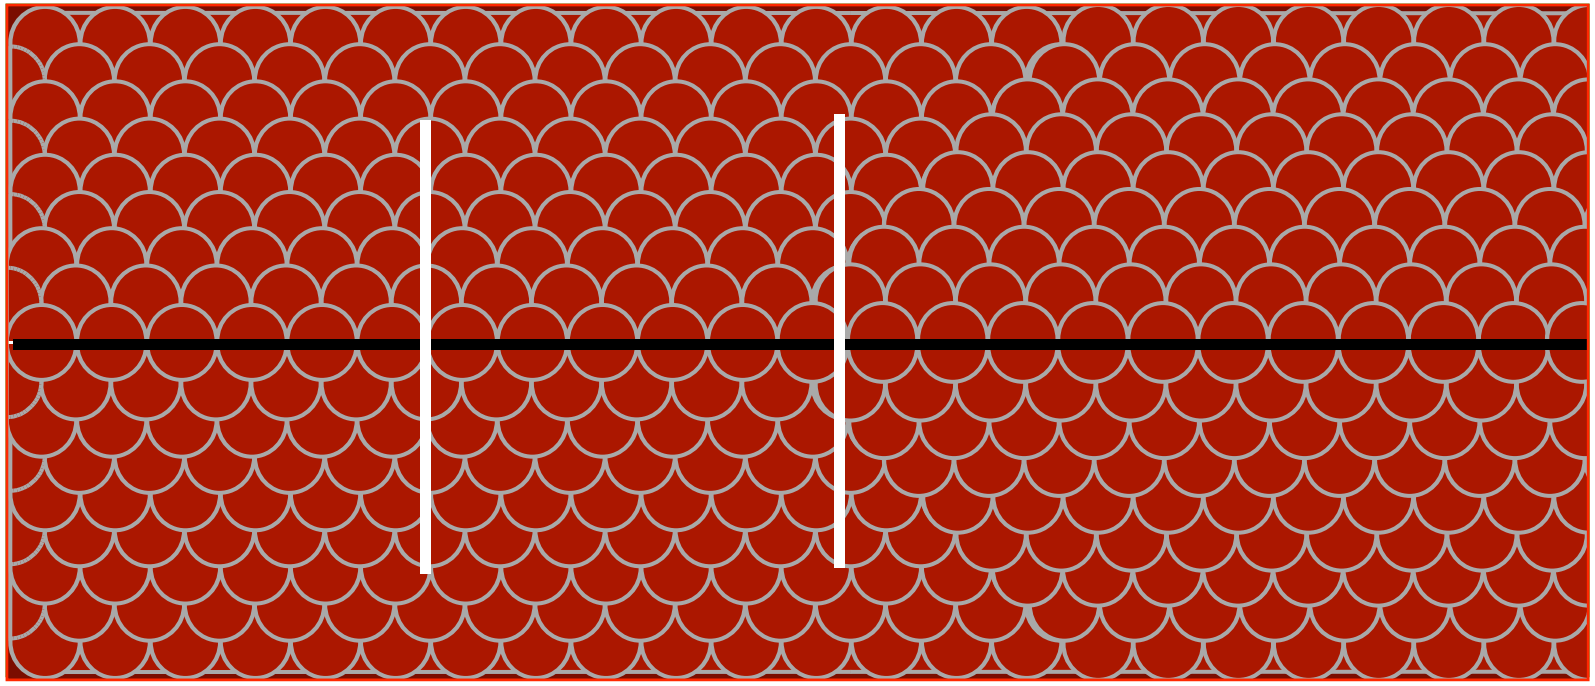
To assemble:

- Cut the building from this sheet with scissors. Cut slits carefully with hobby knife.
- Fold and gently crease tabs, corners of building, roof panels and bottom flaps.
- Slip tabs into slots. Save bottom flaps until last.
- Fold bottom flaps under in numerical order. Flap 4 is last and should tuck under Flap 1 to hold them all in place. Use glue or tape for permanent assembly.

For more ideas and inspiration, visit www.meddybemps.com/trains/village.html.

Cut out. Fold in half. Slip starred ends through slits in upright signs after you slide roof onto building and gas pumps.

Cut out along red lines.



Cut slits along the white lines for signs to slide through. Make the openings wide to allow signs to slide through easily.
